Percentage: 72%

Professional Experience

Junior Frontend Developer — growth.cx, Mumbai (May 2024 – Present)

- Developed and deployed the company website.
- Managed hosting and server tasks across multiple projects.
- Built client-side UI using React, Tailwind CSS, and Redux.
- Integrated backend APIs using Golang (Fiber) and PostgreSQL.
- Sent client newsletters via HubSpot and SendFox.
- Delivered WordPress and Webflow websites with responsive design.

Projects

Suitejar

- Built UI using Ant Design and Tailwind CSS.
- Managed app state with Redux; used redux-persist for optimized performance.
- Created APIs using Golang (Fiber) and worked with PostgreSQL.
- Reduced server load by identifying and removing redundant API calls.

Growth.cx / GCX Academy

- Developed and deployed PHP + Tailwind websites using WordPress.
- Used Git, Hostinger, and SSH for version control and deployment.
- Configured domains, subdomains, and WordPress installations.

Gallery Vision

- Delivered PHP and Tailwind-based WordPress site for a client.
- Worked directly with clients to implement features and changes.
- Used Git, Hostinger, and SSH for version control and deployment.

Aiotests & P3logiq.com

- Built SEO-optimized Webflow sites from scratch.
- Added analytics (Google, Facebook Pixel), responsive design, and animations.
